

PRESS RELEASE

Air Conditioning at Prestigious Art Gallery

All Seasons Hire have recently supplied the air conditioning system for a prestigious art exhibition.

When a large gallery were holding a week long art exhibition they turned to All Seasons Hire to provide the Air Conditioning. After being contacted well in advance of the exhibition date All Seasons Hire began to extensively plan the provision of the necessary Cooling Equipment. During this planning stage All Seasons Hire attended the site on three occasions to carry out site surveys, making sure that every aspect of the Air Conditioning Installation had been thoroughly thought out.

The Air Conditioning System supplied by All Seasons Hire included three separate Chillers and nine Air Handling Units including all necessary accessories and pipework. This configuration of units was used due to the layout of the venue suiting separate systems for each of the three rooms to be Cooled. Each room had its Air Conditioning supplied by a dedicated 50Kw Chiller, running three 15Kw Air Handling Units to distribute the Cooled Air evenly.

Due to the prestigious nature of the Event All Seasons Hire took several extra steps during the three day install of the Air Conditioning System. This included using a special Silenced Generator to supply the electricity for the Chillers. With the Air Handling Units running off of standard 13amp plugs inside the venue. All the pipework connecting the Chillers to the Air Handling Units was discreetly installed running along the ceiling

The nature of the Event meant that special attention had to be paid to all aspects of the job. Special care was taken whilst installing the water pipework to ensure no damage to the venue or exhibition items. Whilst the Air Conditioning System was in place All Seasons Hire offered a 24 hour emergency call out service so that any problems could be quickly solved. However the service was not needed and the Event was a great success.

All Seasons Hire has a wide range of Portable Chillers ranging from 10kW to 550kW. The mix of Chillers available for Hire gives All Seasons Hire the flexibility to provide Temporary and Fixed Cooling Solutions of all types including Portable Air Conditioning, Portable Process Cooling, Low Temperature Applications. The company also supplies Portable Boilers ranging from 22kW three phase electric to 550kW Oil Fired or Natural Gas fired

All seasons Hire provides Air Conditioning, Portable Chillers, Portable Boilers, Commercial Refrigeration and Heating Solutions for all types of business environments including small medium and large Events and Exhibitions, Server Room Air Conditioning, Disaster Recovery and any environment requiring Temporary Air Conditioning, Heating or Drying
