

PRESS RELEASE

Chiller System for the Cold Store at a chicken farm

When the Chiller System for the Cold Store at a chicken farm broke down a quick Cooling Solution was needed. A call was put in to All Seasons Hire to find out what Low Temperature Cooling Solutions could be offered. The Chiller System recommended by All Seasons Hire was a 50Kw Glycol Chiller with two 20Kw Air Handling Units. The 50Kw Chiller unit was situated externally with the two Air Handling Units located within the Cold Store to distribute the Conditioned Air. The Cold Store needed to be constantly maintained at temperatures below 0oC. This meant that All Seasons Hire had to take extra considerations including fitting the Air Handling Units with defrost systems. The Chiller System operated successfully for a number of months until the new Fixed Cooling System had been installed and commissioned.

All Seasons Hire has a wide range of Portable Chillers ranging from 10kW to 550kW. The mix of Chillers available for Hire gives All Seasons Hire the flexibility to provide Temporary and Fixed Cooling Solutions of all types including Portable Air Conditioning, Portable Process Cooling, Low Temperature Applications. The company also supplies Portable Boilers ranging from 22kW three phase electric to 550kW Oil Fired or Natural Gas Fired.

All seasons Hire provides Air Conditioning, Portable Chillers, Portable Boilers, Commercial Refrigeration and Heating Solutions for all types of business environments including small medium and large Events and Exhibitions, Server Room Air Conditioning, Disaster Recovery and any environment requiring Temporary Air Conditioning, Heating or Drying
