

## PRESS RELEASE

### Chiller Hire for Summer Ice Rinks

It may be summer in the UK but there is still a high demand for Temporary Ice Rinks. All Seasons Hire is currently supplying Chillers for Temporary Ice Rinks to several companies including a production company putting on a show on ice. All Seasons Hire originally supplied Chillers to the production company during the UK run of the show. The production company were so pleased with the quality of the Trane AquaStream2 Chiller and level of service provided that they decided to use All Seasons Hire for their tour around the far east, including Hong Kong Singapore, South Korea and Vietnam, For the eastern tour All Seasons Hire were able to offer an installation service each time the tour moved on to a new town and the Temporary Ice Rink was reinstalled.

The All Seasons Hire Trane Low temperature Chiller Units range from 50kW to 500kW, they were purchased with specialist applications like Ice Rinks in mind.

All Seasons Hire was also recently asked to provide Chillers to maintain a Temporary Ice Rink at a large summer camp. Two 100Kw Trane AquaStream2 Chillers were selected for the application. The Chillers were selected for their reliability as they need to be able to maintain the Temporary Ice Rink continually for a 16 week period.

All Seasons Hire supply and install a wide range of Portable Chillers, Air Conditioning, Portable Boilers, Heating and Commercial Refrigeration products. Sectors supplied include Events, Construction, MOD, Hospitals and Government, M&E Contractors, Retail, Facilities Management and many more.
