

## PRESS RELEASE

### **All Seasons Hire Continues with its growth plans and Introduces further products to their Range of Containerised Portable Hot Water and Heating Boilers**

Following the earlier introduction of their brand new Boiler Hire fleet; All Seasons Hire has taken delivery of additional models. The new Portable Packaged Boiler Rooms give even more flexibility to the already significant fleet of brand new boilers. Following feedback from consultants and end users, the new 100kW boilers are much more compact; the revised foot-print enable the Hire Boiler to be installed in the smallest of spaces. The new container is very robust enabling ease of transportation; however the smaller foot- print and newly designed container does not distract from the high build quality and high standard of components used. Four new 500kW Portable Boilers were also delivered to the company in April 2009. This is the latest batch of newly designed Containerised Portable Boilers. The first delivery of the 2009 Portable Boilers were capable of delivering 250kW of Heating and Hot Water duty; they are fully self- contained and designed to the highest standard using quality parts and components. The 250kW and 550kW Boilers are manufactured by Ferroli, the Pumps are Gundfoss, Heat Exchangers are Alpha Laval, controls and electrical components are Siemens; all other components are also manufactured to a high specification. The Portable Boiler Room is designed for easy installation and maintenance; it is fully compliant to UK quality standards and can be run on Diesel Oil or Natural Gas.

Managing Director Kelvin Fogwill stated "We have been developing our Boiler and Chiller Hire business throughout 2008 and 2009; our Hire Fleet of both Boilers and Chillers is now significant. However demand for high quality fuel efficient Portable Boilers is growing. We currently have 100% utilisation of our Portable Boiler Hire Fleet which includes 100kW, 200kW, 250kW and 550kW Boilers. Demand from our customers is changing with every project; all too often hire companies try to attempt projects with the wrong product, at All Seasons Hire we intend to listen to the needs of consultants, engineers and end users and build our new hire fleet with specific design features aimed at delivering cost effective Boiler Hire solutions. We are also developing a range of Steam Boilers to add to our growing hire fleet.

Our latest 550kW Boilers come in fully mobile towable versions or fully Portable Containerised Plant Rooms. Following this latest delivery of the 100kW and 250kW units, we will be receiving four more 500kW portable Boilers; these will also be built to our own design using Ferroli Boilers and the same high quality components used in the 250kW model".

The Portable Boilers currently on hire from All Seasons Hire are delivering Hot Water and Heating to a wide range of projects including several Hospital Refurbishments, University Refurbishments, Royal Navy Facility Refurbishment, Retirement Homes and several Under Floor Heating projects.

All Seasons Hire has a large and comprehensive Boiler Hire Fleet ranging from 22kW three Phase Electric, to 550kW Oil or Natural Gas. Their other Hire products also includes 14000 BTU to 35000 BTU Portable Air Conditioning units, Portable Chiller Units ranging from 50kW to 550kW, Portable Space Heaters from 20 to 200kW, Dehumidifiers and Commercial Refrigeration.
