

PRESS RELEASE

Portable Heater Hire keeps garage workforce happy

All Seasons Hire was recently called in to provide Emergency Heating for a national chain of vehicle repair garages. The cold spell has caused several garages throughout the UK to need more Heating Capacity for the mechanics and engineers. With doors consistently opening and closing staff were finding the “arctic blast” too much and requested more Heating. All Seasons Hire quickly surveyed each of the sites and put forward a plan to provide indirect Fired Heating for each of the sites.

Commercial Director Andrew Hamilton stated “we often get emergency calls that require a fast response, the guys working at these garage sites were finding it difficult to work in the cold conditions. We have installed fume free Oil Fired Indirect Heaters ensuring that a constant level of additional Heat is provided. Our indirect fired heaters are very efficient, they are simple to install and clean to use” All Seasons Hire provide a wide range of Heating and Air conditioning Hire solutions including Indirect and Direct Heating, Portable Boiler rooms ranging from 100kW to 550kW, portable Air Conditioning and Portable Chillers ranging room 20kW to 500kW.
