

PRESS RELEASE

All Seasons Hire Install Chillers for Portable Ice Rinks

With the Festive Season just around the corner the business of installing Ice Rinks has started with earnest. All Seasons Hire is currently working with several event companies supplying and installing Ice Rinks in towns and cities around the country. Commercial Director Andy Hamilton stated "These Portable Chiller installations are not always straight forward; we always build in contingency plans ensuring that in the unlikely event of product failure we can recover things fast, no one likes skating on water! We only use specialised low temperature Chillers for these Portable Ice Rink Installations, we mainly use Trane Chillers, and they are high quality and can supply us with the best possible Chiller Hire solution for Ice Rinks, they are robust and have low failure rates even in the toughest environments. We have invested in a wide range of Portable Chillers; the Trane Low temperature Chiller Units range from 100kW to 500kW, they were purchased with specialist applications like Ice Rinks in mind." All Seasons Hire provides all sectors of business with Portable Chiller Hire for temporary Air Conditioning and Process Cooling.
